

AI DOCUMENT FORENSIC VERIFICATION CERTIFICATE

Multi-Spectral Computer Vision & Machine Learning Forensic Analysis Report

Document UUID: TAMP-102	Verification Verdict: GENUINE
File Name: tampered_doc.jpg	Forensic Confidence: 96.4%
Analysis Date: 2026-08-19 06:50:57 UTC	Risk Level: LOW
Inference Pipeline: MultiSpectral-Forensic-v2.0 (8-Module Ensemble)	Primary Tampering Category: None (Authentic Baseline)
Processing Latency: 0.19s	Suspicious Anomaly Zones: 0

8-MODULE SPECIALIZED FORENSIC AUDIT SCORECARD

Analysis Module	Status	Risk Level	Score	Key Findings Summary
Visual & Compression Discrepancy Module	PASS	LOW	88.1%	Uniform JPEG compression grid consistent with original camera/scan capture.
Noise Variance & Sensor Fingerprint Module	TAMPERED	HIGH	98.5%	Elevated spatial noise inconsistency score (4.284 vs normal <0.85)
Copy-Move & Spatial Cloning Module	PASS	LOW	95.0%	No unnatural feature duplication or copy-move cloning detected.
Typography, Font & Baseline Alignment Module	PASS	LOW	94.0%	Typography, font geometry, and baseline alignment are homogeneous across all lines.
Color Space & Illumination Gradient Module	PASS	LOW	95.0%	Color channels and illumination gradient vectors demonstrate natural, single-light-source uniformity.
Signature & Official Stamp Verification Module	PASS	LOW	85.0%	Document evaluated without specialized ink stamp overlays.
Metadata & File Structure Forensics Module	PASS	LOW	94.0%	Clean camera/scanner metadata footprint without third-party graphics editor markers.
Security Features, Barcode & MRZ Forensics Module	PASS	LOW	90.0%	No active security barcode or MRZ zone detected on current document page.

LEGAL FORENSIC NOTICE: This verification certificate was generated by an automated multi-module AI & Image Processing Forensic Analysis Pipeline. Confidence percentages and suspicious region bounding boxes represent machine-learning inferences based on mathematical pixel variance, frequency gradients, and sensor noise statistics.
